2014 - 2018

PROFILE

Hello! A year ago I started my way in web development. Thanks to my previous experience at the position of SEO Specialist, I had experience in HTML, CSS and work in a team of developers and designers. It helped me a lot in studying new technologies and tools. I finished two web development courses by Ivan Petrichenko and felt confident that I was doing. I also maintain actively my GitHub profile and fill it with projects with interesting technologies for me. My goal is to become a highly qualified React developer and create cool web applications for users all over the www.
